

Brackets

I can't get the First Four games to show up on the Web Entry form or the Bracket display even when I select it in preferences. How do I set up the First Four games?

After you select First Four (Preferences, Teams tab), you will also need to select an opponent for each region. Here are the steps to take:

1. Open the Preferences window
2. Select "Teams" from the toolbar menu
3. Select "Use First Four" checkbox
4. Select "First Four" from the "Regions" list
5. Select a team from the right-hand list
6. Select an opponent from the "Opponent" popup menu
